The Solution

A responsive, mobile-first web application that mirrors the tactile elegance of a bookshop: effortless discovery, thoughtful curation, and a secure, unobtrusive checkout flow.

Key Features & User Flow

Browse

Add to cart

Secure checkout

Delivery

Delivery

Dynamic Rendering

Serverless rendering of curated collections with routes and graceful fallbacks for slow connections.

Smart Cart

State-aware cart that persists locally and syncs on login —

Checkout

PCI-aware flow, clear shipping options and simple address capture

Technology Stack

Deliberately lightweight — prioritise speed, maintainability and direct control of the DOM.

Front End

Vanilla JavaScript (ES6+), semantic HTML5 and modern CSS3. Bootstrap 5.3 for accessible components.

Backend & Data

Supabase (PostgreSQL) as a RESTful data layer — lightweight, predictable and easy to manage.

UX Enhancers

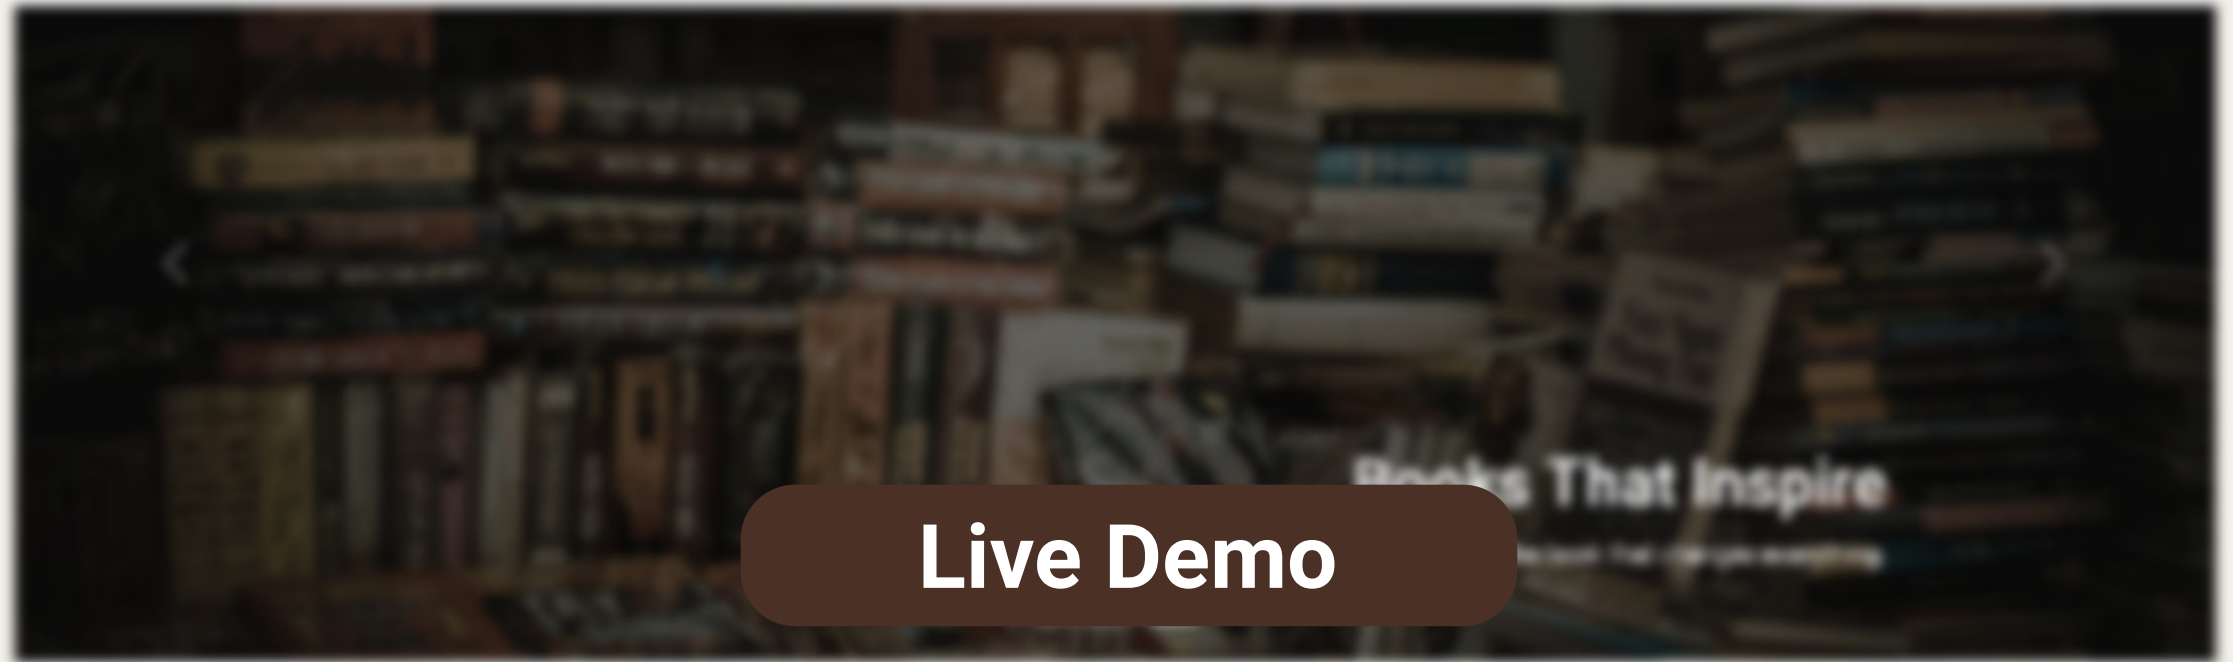

SweetAlert2 for elegant micro-interactions and clear user feedback.

Architecture & Data Flow

The design separates concerns: Supabase supplies canonical data; the client renders quickly and caches state locally. Authentication gates write operations; localStorage preserves in-progress shopping when offline.
